

PRESS RELEASE

Hansa Biopharma to host conference call to provide interim results for the first half of 2020 and business update

Lund, Sweden June 30, 2020. Hansa Biopharma will publish its interim report for January-June 2020 at 8:00 a.m. CET on July 16, 2020. All interested parties are invited to participate in a telephone conference, which will include a presentation of the interim results and a business update, on the same date at 2:00 p.m. CET. The event will be hosted by Hansa Biopharma's CEO, Søren Tulstrup, and CFO, Donato Spota, and the presentation will be held in English.

Slides used in the presentation will be live on the company website during the call under "Events & Webcast," and will also be made available online after the call.

To participate in the telephone conference, please use the dial-in details provided below:

Dial-in numbers for participants:

SE: +46 8 56 64 27 07

UK: +44 333 300 92 65

US: +1 833 249 84 07

The webcast will be available on <https://hansa.eventcdn.net/20200716/>

The information was submitted for publication, through the contact person set out below, at 8:00 a.m. (CET) on June 30, 2020.

About Hansa Biopharma

Hansa Biopharma is leveraging its proprietary enzyme technology platform to develop immunomodulatory treatments for enabling transplantations and rare immunoglobulin G (IgG)-mediated autoimmune conditions, transplant rejection and cancer.

The Company's lead product candidate, imlifidase, is an antibodycleaving enzyme being developed to enable kidney transplantation in highly sensitized patients and may be further developed for use in other organ and tissue transplantation as well as acute autoimmune indications.

CHMP/EMA has adopted a positive opinion, recommending conditional approval of imlifidase for the desensitization treatment of highly sensitized adult kidney transplant patients with a positive crossmatch against an available deceased donor. Endorsement of the positive opinion by the European Commission is expected in the third quarter of 2020.

Hansa's research and development program is advancing the Company's enzyme technology to develop the next generation of IgG-cleaving enzymes with potentially lower immunogenicity, suitable for repeat dosing in relapsing autoimmune diseases and oncology. Hansa Biopharma is based in Lund, Sweden and also has operations in other European countries and in the U.S.
