

PRESS RELEASE

Hansa Biopharma to host conference call to provide Year-End report 2020 and Business Update

Lund, Sweden January 27, 2021. Hansa Biopharma will publish its Year-End report 2020 at 8:00 CET on February 4, 2021. All interested parties are invited to participate in a telephone conference, which will include a presentation of the interim results and a business update, on the same date at 14:00 CET/2:00pm EST. The event will be hosted by Hansa Biopharma's CEO, Søren Tulstrup, and CFO, Donato Spota, and the presentation will be held in English.

Slides used in the presentation will be live on the company website during the call under "Events & Webcast," and will also be made available online after the call.

To participate in the telephone conference, please use the dial-in details provided below:

Sweden: +46 8 50 55 83 50

United Kingdom: +44 333 300 92 72

United States: +1 833 526 83 47

The webcast will be available on <https://streams.eventcdn.net/hansa/2020h2/register>

The information was submitted for publication, through the contact person set out below, at 8:00 a.m. (CET) on January 27, 2021.

About Hansa Biopharma

Hansa Biopharma is leveraging its proprietary enzyme technology platform to develop immunomodulatory treatments for enabling transplantations and rare immunoglobulin G (IgG)-mediated autoimmune conditions, gene therapy and cancer.

The Company's lead product candidate, imlifidase, is an antibody cleaving enzyme being developed to enable kidney transplantation in highly sensitized patients and may be further developed for use in other organ and tissue transplantation as well as acute autoimmune indications.

Imlifidase has been granted conditional approval in the European Union for the desensitization treatment of highly sensitized adult kidney transplant patients with a positive crossmatch against an available deceased donor.

Hansa's research and development program is advancing the Company's enzyme technology to develop the next generation of IgG-cleaving enzymes with potentially lower immunogenicity, suitable for repeat dosing in relapsing autoimmune diseases, gene therapy and oncology. Hansa Biopharma is based in Lund, Sweden and has operations in both Europe and the U.S.
