

French hospital orders PrepLog®

L'Hôpital Privé du Confluent in Nantes, France has ordered PrepLog® systems. The system is to be used for final control of cytotoxic drugs at the hospital pharmacy and will be integrated with the hospital's prescribing system. Nantes has been using DrugLog® clinically since 2017. The agreement is entered into with Pharmacolog France SARL.

L'Hôpital Privé du Confluent (PYR) in Nantes has for a number of years used DrugLog® for final control of cytotoxic preparations made at the hospital pharmacy. PYR has now signed an agreement with Pharmacolog France SARL to install the new PrepLog system that enables integration with their prescription software Chimio, from the company Computer Engineering. The integrated solution means improved workflow and automated reporting functions. The order amount for the French subsidiary is approximately SEK 850 000 over 4 years.

CEO Mats Högberg comments: "It is extremely gratifying that Nantes has decided to move forward with Pharmacolog and is investing in upgrading to PrepLog®. Nantes has used an early version of DrugLog® clinically for several years with good results but will, as they switch to PrepLog®, further streamline their quality control. PrepLog® allows a fully integrated workflow and complete traceability of test results that was not previously possible."
