

First DrugLog® system to Belgium

Cliniques universitaires Saint-Luc, Brussels, Belgium has ordered a DrugLog® system. The system will be used for the final control of cytotoxic drugs at the hospital pharmacy. The agreement is entered into with Pharmacolog France SARL and is the first installation of DrugLog® in Belgium.

Clinique universitaires Saint-Luc (UCL) is Brussels' largest hospital with 5,800 employees and 970 beds. In addition to providing optimal patient care, Saint-Luc collaborates with the Université Catholique de Louvain in research, innovation and teaching. UCL has a comprehensive non-sterile and sterile device that includes preparations for chemotherapy. UCL Saint Luc has now signed an agreement with Pharmacolog France SARL to install DrugLog® which will be used to control the cytotoxic drugs. The order value is approximately SEK 700,000 over a period over three years.

Didier Dubois, Sales Manager Pharmacolog SARL comments: "I am pleased that UCL Saint Luc has decided to install DrugLog® to perform quality control of its prepared cytotoxic preparations. DrugLog® will be an excellent complement to the already high safety standards that are being practiced in Saint-Luc. A big thank you to the staff at UCL for their confidence in the implementation of this project. UCL Saint Luc and Pharmacolog are now collaborating to strengthen patient safety. From Pharmacolog's perspective, it is also very gratifying to break into the Belgian market with this first installation."
