

# Pharmacolog takes additional order in Belgium

**Hospital Delta, Auderghem (Belgium) has ordered a DrugLog® system. The system will be used for the final control of cytotoxic drugs preparations and installed in the clean room. The agreement is entered into with Pharmacolog SARL in France.**

Delta (Group CHIREC) is a 545-bed hospital with 28 operating rooms, it was inaugurated in January 2018. The chemotherapy preparations are compounded in two isolators providing optimal sterility of the IV bags but also a comprehensive safety for the operators. Group CHIREC has now signed an agreement with Pharmacolog SARL France to install DrugLog™ for final quality control.

Didier Dubois, Sales Manager Pharmacolog SARL comments: "I am pleased that the CHIREC Group has decided to install DrugLog™ at Delta Hospital to perform quality control of its compounded cytotoxic preparations. DrugLog™ will be an excellent complement to the high standards of compounding that are being practiced at Delta Hospital where a lot of safe connectors and closed systems are used in routine to strengthen not only the safety of the patient but also the operator. A big thank you to Dr Stichelbaut, Drs Delune and the pharmacy team for their confidence in the implementation of this project. From the Pharmacolog's perspective, it is also very encouraging to expand the installed base in Belgium with a new installation."

## **About Pharmacolog AB**

**Pharmacolog** provides solutions and products that enhance work efficiency and safety when preparing injectable medication. Our goal is to help prevent medication errors and ensure maximum medication efficacy when treating patients with powerful yet potentially harmful injectable drugs. Pharmacolog's products, [DrugLog®](#), [WasteLog®](#) and [PrepLog®](#), help staff at pharmacies and hospital wards minimize the risk of errors in the compounding process. Furthermore, by verifying that drugs and narcotics used in surgery have not been tampered with, our solutions also make a vital contribution to preventing drug diversion.
