

Pharmacolog Dashboard™ increases efficiency of pharmaceutical validations

Pharmacolog launches a new software module, Expert guidance, which provides remote access to measurements for real-time analysis and thus facilitates remote expert advice.

The new web-based tool Pharmacolog Dashboard™ has been well received by customers since the launch of the first Reporting module. It provides remote access to a comprehensive overview of all pharmaceutical validations performed with all devices in Pharmacolog's product portfolio, WasteLog™, DrugLog™ and PrepLog™. With the launch of the second module, Expert guidance, users can access measurements for real-time analysis of a spectral graph to provide expert advice from a remote location.

Several distributors and customers have been involved in the definition and validation of the new module Pharmacolog Dashboard™ Expert guidance. Jordi Domingo, Product Manager at Pharmacolog's distributor B. Braun in Spain comments: "Our customers use DrugLog™ in cleanrooms to validate toxic chemotherapy preparations in connection with the compounding process. By introducing Pharmacolog Dashboard™ Expert guidance, senior pharmacists will be able to remotely assist colleagues with complicated compounding processes, without having to gown up in full protective clothing required to enter a cleanroom. Furthermore, whenever our support is requested, we will be able to assist customers without delays. This is a timesaver for all parties."

Pharmacolog Dashboard™ Reporting and Expert guidance will be showcased at the European Association of Hospital Pharmacists, EAHP congress March 22-24 in Lisbon, Portugal.

About Pharmacolog

Pharmacolog provides solutions and products that enhance work efficiency and safety when preparing injectable medication. Our goal is to help prevent medication errors and ensure maximum medication efficacy when treating patients with powerful yet potentially harmful injectable drugs. Pharmacolog's products help staff at pharmacies and hospital wards minimize the risk of errors in the compounding process. Furthermore, by verifying that drugs and narcotics used in surgery have not been tampered with, our solutions also make a vital contribution to preventing drug diversion.

The following trademarks are owned and protected by Pharmacolog i Uppsala AB: Pharmacolog™-logo, [DrugLog™](#), [WasteLog™](#), [PrepLog™](#) and [Pharmacolog Dashboard™](#).
