

## Redsense presents at Sedermeradagen Stockholm 2023

On the 30th of May, Sedermera Corporate Finance will once again host Sedermeradagen. The event will take place at Hotel At Six and offers the opportunity to get to know 15 exciting companies and mingle with some of Sweden's most active small cap investors.

Redsense CEO Pontus Nobréus will present the company and answer your questions; the presentation will be held in Swedish. To register and for more information about the event: <http://bit.ly/3nLhOUB>

### ABOUT REDSENSE MEDICAL

Redsense Medical is a corporate group with operations mainly in Europe and the United States. The company has developed the Redsense System, an innovation used for monitoring and alarm in the case of blood leakage in connection with a hemodialysis treatment.

Redsense Medical solves one of the most serious remaining safety problems within hemodialysis – to quickly detect Venous Needle Dislodgement and catheter leakage to minimize blood leakage. The system consists of a patented fiber optic sensor, designed for either venous needle or central venous catheter, which is connected to an alarm unit. From the very start, the development of the company's technology has been based on the demands and safety requirements of healthcare providers in the dialysis sector.
