

Insplorion recruits CFO

Insplorion is recruiting Per Giljam as Chief Financial Officer (CFO). Per comes most recently from Vitrolife, where he has been Business Controller. Before that he worked with auditing at PwC. The recruitment is, in addition to financial control and reporting, another step in the company's expansion where the reinforcement will mean better support for the company's business units.

Per will start his employment 6th of September 2021 and will replace Henrik Landervik who has served as the company's external CFO. Henrik will be available during a transition period to ensure good continuity.

"We are facing the upscaling of our sensor business and see that Per's years of experience in both auditing and as a business controller give him the breadth and depth needed to continue to increase the company's commercial transformation. We are very happy to have him in our team", comments CEO Patrik Dahlqvist.

Insplorion AB, with its disruptive sensor platform NanoPlasmonic Sensing (NPS), operates within four fields: air quality sensors, hydrogen sensors, battery sensors and research instruments. The sensors are small, durable and cost efficient at volume production. Our sensor technology enables air quality sensors at home, in cars and in public environment. Our hydrogen sensors show a sub-second response time, making them the fastest in the world and will promote the growth of hydrogen infrastructure. The battery sensor optimizes battery control and usage. Our instruments give scientists around the world nanometer sensitive real time data of surface processes in fields like catalysis, material- and life science. FNCA Sweden AB, +46(0)8-528 00 399 info@fnca.se, is Insplorion's Certified Adviser at Nasdaq First North.
