

## **Lecot-Raedschelders Belgium chooses BizView**

Our partner Climber (Benelux) have sold their first BizView solution to the Belgian hardware and tools distributor Lecot-Raedschelders. Lecot has chosen BizView to be their budgeting and forecasting tool across internal business units, and will be a crucial part of their business management process. The solution will be implemented during first half of 2016.

Climber Benelux Director Bert Otter: "Climber already created a Foundation Framework to optimize the Qlik environment at Lecot. All business requirements and rules for further analysis are stored here. BizView is seamlessly integrating in this environment. The Excel-like ease of use also proved to be a valuable asset for Lecot-Raedschelders.

The cooperation and partnership with BizView, will also be extremely interesting for our installed base and potential new customers. It is a true valuable addition to the Qlik Platform"

Jens Karlsson, VP Global Partner Program at Bizview says "This contract is another big step in our aim at becoming an international recognized brand. Together with our enthusiastic partner Climber, this will be the start of many successful implementations in this region. At Bizview we already know that our customers are very satisfied, it will be exciting to follow the development of this new market and to hear the stories from future customers".

### **About BizView and Bizview Systems**

BizView is one of the leading systems for forecasting, budgeting, reporting, analysis and consolidation. The software provides a web-based Excel-like user interface combined with powerful workflow management. BizView is an open solution that also fits well with QlikView's and Microsoft's business intelligence offerings. BizView is developed and marketed by Bizview Systems with offices in Scandinavia and is marketed outside Scandinavia by partners. Over 1000 companies use our solutions.
