

Suborder BizView conveniently via framework agreement!

Now, Swedish municipalities, municipal companies and county councils can easily call off BizView through Kommentus framework agreement "Programvaror och programvaror som molntjänst 2014" (Software and software as a cloud service in 2014). BizView Systems is listed as a subcontractor to Fujitsu Sweden AB.

Peter Winkler, BizView Systems: "BizView has in recent years gained many new customers in the government and public enterprises. Now that BizView also can be subordered under a framework agreement for municipalities and county councils, it makes it easier for new customers to order BizView for their business." Peter also says that there is great interest in BizView from public enterprises in Sweden, and we expect strong growth in this market in the coming years.

About BizView and Bizview Systems

BizView is one of the leading systems for forecasting, budgeting, reporting, analysis and consolidation. The software provides a web-based Excel-like user interface combined with powerful workflow management. BizView is an open solution that also fits well with QlikView's and Microsoft's business intelligence offerings. BizView is developed and marketed by Bizview Systems with offices in Scandinavia and is marketed outside Scandinavia by partners. Over 1000 companies use our solutions.
