

Flisekompaniet have chosen BizView

The main focus for Bizview has traditionally been on service and project-oriented businesses, manufacturing businesses and government branches. The new, and exciting fact is that during the past year there has been a steady growth of interest for BizView from the Retail industry.

So it is with great pleasure we welcome Flisekompaniet into the rapidly growing BizView family. Lars Fjellbirkeland, CEO of Bizview Norway, says that Bizview over the last year has worked with several Scandinavian partners to position BizView for the Retail business.

"Retail is an industry with strong demands for financial management and planning", continues Lars. "It is also an industry where companies often have several different systems working for and with each other, which again can be challenging when implementing new system solutions for planning and decision support. But BizView is a powerful and flexible tool and can be seen as a "universal key" that handles most needs, making BizView a perfect match to the Retail business."

Flisekompaniet is one of the leading companies in the Norwegian market for floor tiles. BizView will be integrated as part of the company's existing system, i.e. ERP system, POS systems and more. This will give Flisekompaniet the resources needed for an improved economic governance. Or expressed with the BizView mantra: BizView - Planning and Reporting the way you want it. Faster.
