BizView for QlikView version 7.0 - Faster and easier, improved user experience and greater flexibility!

BizView for QlikView is an addition to QlikView's solution for performance management with budgeting, forecasting and financial reporting, and is designed specifically to complement QlikView as a BI platform. Version 7.0 of BizView for QlikView combines the best of QlikView with powerful functionality for performance management from BizView.

The dialogue we have with our users is golden and vital for some of the improvements in this update. We also added some cool features and solutions we have had on the drawing board for quite some time. Our focus has been single minded. User experience. Improved user experience. The goal was to make BizView for QlikView more powerful and easier to use than any alternative in the market and we ended up with version 7.0 of BizView for QlikView - the best and most extensive improvement we have ever made.

"We have had a fantastic year so far, with the launch of version 7.0 of BizView", says Chairman of the Board, Oskar Kristiansen. "Access to new markets, new partners and new customers confirms that BizView emerges as something unique in the market".

"With the new version of BizView, we enter a new and challenging phase. Our strategic alliances with partners will ensure that QlikView users worldwide will hear more about BizView for QlikView."

BizView for QlikView is a web-based solution where BizView and QlikView interact to give the user a consistent experience. A user can, i.e. in the planning process, go directly to QlikView to understand the historical development and trends.

BizView for QlikView is the easy way to give the organization superior performance management!
