

BizView consolidates its position as one of the leading performance management systems in the Swedish market

BizView continues its strong growth on the Swedish performance management market. After BizView 7.0 was launched earlier this year, demand for BizView in the Scandinavian market have had an explosive development. Each week, we welcome new clients into the BizView family and the focus for all new customers is the need to develop and improve their performance management. It is then particularly gratifying to us to wish JCDecaux Sweden and Svensk Direktreklam welcome to the BizView family as they both represent companies and industries with high demands on financial management and planning.

"With BizView 7.0, we can combine simplicity, flexibility and very strong functionality to support them in the most cost effective way we have never seen before among similar systems" comments Göran Stridbeck, Managing Director at NCG Sweden.

About BizView and NCG Group

BizView is one of the leading systems for forecasting, budgeting, reporting, analysis and consolidation in the Nordic countries. The software provides a web-based Excel-like user interface combined with powerful workflow management. BizView is an open solution that also fits well with QlikView's and Microsoft's business intelligence offerings. BizView is developed and marketed by NCG Group with offices in Scandinavia and is marketed outside Scandinavia by partners. Over 1000 companies use our solutions.
