

Västerbottens County Council (VLL) chooses BizView

Västerbottens County Council (VLL) has decided to upgrade its solution for budget management with BizView as budgeting and forecasting tool. The system has been implemented in the fall by Evry and is now in place and used in the 2016 budgeting process.

In BizView, budget managers at various levels in the organization can plan for resource demands in terms of staffing and running costs. During the year, adjustments are made based on changed conditions in the business. The solution prepared is in the forefront so that not only costs are handled, but also hours and smart accruals over the year are supported.

Leif Lindgren, project manager at Evry, who has been working intensively on the project says, "We have in previous versions of the budgeting system worked long with the county council and their needs related to budgeting. That experience has come in handy when implementing BizView. "

Erik Lidman, development manager of BizView says "The strength with BizView is to be able to create almost any kind of solution. It is made possible by the Excel-like input forms in the web browser, with advanced logic, combined with a central database for storing of data. It provides centralized control and effective planning processes. It is with great pleasure we welcome the Västerbottens County Council as users of BizView."

During 2016, VLL will also start using BizView for other needs such as internal costing and management of accounting orders.
