Linköping July 4, 2012

First sale of Sectra Visualization Table to the Russian market

St Petersburg Scientific Practical Centre for Oncology has invested in the [Sectra Visualization Table](#). The table will be used by the hospital's oncologists to prepare surgery and treatment thereby improving quality in patient care. Interns and residents can use the visualization table as a learning platform to discuss the surgical procedure with the physician before and after the actual operation.

With the visualization table the hospital's doctors can easily assess size, form and orientation of a tumor and its relation to surrounding tissue and vessels. They can thus commence the surgical procedure with a well-aligned strategy and an awareness of complicating factors, which saves time and improve the outcome of surgery.

The table was sold by Sectra's partner McBrothers in Russia.

About Sectra Visualization Table

With [Sectra Visualization Table](#) the users can interact collaboratively with the real-size 3D images generated by CT and MRI scanners. They can, for example, visualize different kinds of tissues and cut through sections with a virtual knife. The large monitor and intuitive touch interface support group discussion between medical teams. The visualization table makes a significant contribution to medical education, especially in training of interns and residents.

The visualization table is powered by a tailored Sectra PACS workstation. Sectra's patented visualization techniques even allow immediate display of datasets of extreme size, such as high-resolution, full-body scans.

About Sectra

Sectra develops and sells IT systems and services for radiology, women's health, orthopaedics and rheumatology. More than 1,400 hospitals, clinics and imaging centers worldwide use the systems daily, together performing over 55 million radiology examinations annually. This makes Sectra one of the world-leading companies within systems for handling digital radiology images. In Scandinavia, Sectra is the market leader with more than 50% of all film-free installations. Sectra's systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East.

Sectra was founded in 1978 and has its roots in Linköping University in Sweden. The company's business operations include cutting-edge products and services within the niche segments of medical systems and secure communication systems. Sectra has offices in 12 countries and operates through partners worldwide. Sales in the 2011/2012 fiscal year totaled SEK 823 million. The Sectra share is quoted on the NASDAQ OMX Stockholm AB exchange. For more information, visit www.sectra.com
