Scientific Advice from EMA continues

As previously announced, Double Bond Pharmaceutical has submitted a Protocol Assistance request to EMA to obtain scientific advice regarding SI-053 (<https://mb.cision.com/Main/12720/2693686/958625.pdf>) and has now received the answers to their questions. After reviewing the answers, some advice revealed to require a more detailed clarification and the company has therefore sent supplementary questions to EMA to ensure the best strategy for product development in crucial detail and the optimal planning of coming steps. The advice from EMA is based on a number of questions from DBP mainly regarding the preclinical development of SI-053 and the planned Phase I trial in glioblastoma patients. The aim of the scientific advice is to create the most optimal strategy for the development and commercialization of the product.

“I am happy that the development of SI-053 is progressing according to plan and that we have the opportunity to receive a more detailed feedback from EMA that will optimize our strategy”, comments Igor Lokot, CEO at Double Bond Pharmaceutical.

More about Protocol Assistance meeting: <http://mb.cision.com/Main/12720/2664607/939724.pdf>

More about Temodex: Temodex, which is a locally acting formulation of temozolomide developed by RI PCP in Minsk, Belarus, is registered for marketing as the first-line treatment of glioblastoma within Belarus since 2014. Temodex was acquired by DBP in autumn 2015 and is now being prepared to pass through all the tests and trials required for registration within the EU and globally. **Video presentation:** <https://youtu.be/iweQQPq316o>

Information on Double Bond Pharmaceutical International AB

DBP is a pharmaceutical company with the primary focus on development of therapies against cancer based on the company's own developed drug delivery technology BeloGal®. The company was granted Orphan Drug Designation status by European Medicines Agency (EMA) in June 2015 for its first product, SA-033, for treatment of hepatoblastoma. Double Bond Pharmaceutical acquired rights to Temodex, a drug registered in Belarus for treatment of brain tumours, in October 2015, and was granted Orphan Drug Designation status by EMA for in July 2016 for this formulation of temozolomide for the treatment of glioma. The formulation is now being further developed for registration in EU and globally and has a working name SI-053 in DBP pipeline.
