

# PRESS RELEASE

November 8, 2019, Lund, Sweden

## Immunovia Interim Report, January-September 2019

**“The Commercial Test Model” study is going to deliver results according to plan at year-end 2019, and IMMray™ PanCan-d is thus on track for sales start in Q3 2020. The Key Opinion Leader networks continue to grow and provide the company with world-leading expertise, both in the main focus area of pancreatic cancer, with a total estimated market of USD 4.4 billion, as well as in the discovery projects for lung cancer and autoimmunity, with multiple larger total markets.**

“The third quarter was an exciting and eventful time for us at Immunovia following the groundbreaking results of the IMMray™ PanCan-d optimization study. We began the quarter with the first in a series webinar to mark the milestones that Immunovia has reached as we move towards the commercialization of IMMray™ PanCan-d. This first webinar outlined the extraordinary results achieved in the optimization study representing all of our three target risk groups, Familiar/hereditary, New Onset Diabetics as well as Early Symptoms.

At Immunovia, we remain fully committed and focused on IMMray™ PanCan-d. Bringing IMMray™ PanCan-d to market and dominating the market for early detection of pancreatic cancer in the foreseeable future is a fantastic opportunity with a total estimated market potential of USD 4.4 billion in the US and Europe alone, and is now within our reach. By meeting an unmet need, Immunovia will contribute to save many lives.

We continue to be on-schedule and work intensely for all preparations for our planned launch of IMMray™ PanCan-d in Q3 2020, as well as, forward progress with Immunovia’s lung cancer and RA processes.”

*Excerpt from the CEO Mats Grahn’s comment on the report.*

#### **About Immunovia**

Immunovia AB was founded in 2007 by investigators from the Department of Immunotechnology at Lund University and CREATE Health, the Center for Translational Cancer Research in Lund, Sweden. Immunovia's strategy is to decipher the wealth of information in blood and translate it into clinically useful tools to diagnose complex diseases such as cancer, earlier and more accurately than previously possible. Immunovia's core technology platform, IMMray™, is based on antibody biomarker microarray analysis. The company is now performing clinical validation studies for the commercialization of IMMray™ PanCan-d that could be the first blood based test for early diagnosis of pancreatic cancer. In the beginning of 2016, the company started a program focused on autoimmune diseases diagnosis, prognosis and therapy monitoring. (Source: [www.immunovia.com](http://www.immunovia.com))
