About Immunovia
Immunovia AB is a diagnostic company that is developing and commercializing highly accurate blood tests for the early detection of cancer based on Immunovia’s proprietary test platform called IMMray™. Tests are based on antibody biomarker microarray analysis using advanced machine-learning and bioinformatics to single-out a set of relevant biomarkers that indicate a certain disease. Thus, forming a unique “disease biomarker signature”.

The company was founded in 2007, based on cancer studies and ground-breaking research in the Department of Immuntechnology at Lund University and CREATE Health Cancer Center, Sweden.

The first product, IMMray™ PanCan-d, is undergoing clinical evaluation in some of the world’s largest clinical studies for high risk groups in pancreatic cancer, PanFAM-1, PanSYM-1 and PanDIA-1.
In 2017, Immunovia, Inc. was established in Marlborough, Massachusetts, USA. The IMMray™ PanCan-d test, the first blood-based test dedicated to the early detection of pancreatic cancer on the market, is offered as a laboratory developed test (LDT) exclusively through Immunovia, Inc. For more information see: www.immunoviainc.com. The European launch plan will be communicated during the second half of 2021.

Immunovia’s shares (IMMNOV) are listed on Nasdaq Stockholm. For more information, please visit www.immunovia.com.
