

Pressrelease 23 September, 2021

## Brighter's subsidiary Camanio wins allocation decision with Borgholm Municipality for stationary care alarms

**Brighter AB (Publ)** announced today that its subsidiary, Camanio, has won an allocation decision with Borgholm Municipality for stationary care alarms and alarm monitoring at an estimated order value of about 2.4 MSEK. The agreement will include delivery of a digital care platform for alarm monitoring and management, as well as hardware in the form of care alarms, sensors, and wearable alarm buttons.

The agreement to be signed will run for a period of three (3) years with an optional one (1) year extension. The estimated order value of 2.4 MSEK is based on a full four (4) year duration. The award of the contract is subject to an interim appeals period that expires 2021-10-05, which entails that the decision is subject to appeal during this period.

The tender is governed by the temporary framework agreement for stationary care alarms and alarm reception (complete alarm supply chain) issued by Adda (formerly SKL Kommentus Inköpscentral), where Camanio is one of four suppliers. In addition to the delivery of services and hardware, the agreement with Borgholm Municipality includes training and support for all Camanio services and devices.

- The digitization provides good conditions for increasing the individual's experience of security and safety. Through our digital services, we can contribute to Borgholm municipality's work with qualitative care and efficient working methods. We look forward to starting a rewarding collaboration and taking part in the municipality's digitalisation journey, says Catharina Borgenstierna, CEO of Camanio.
