

About Brighter AB (publ).

By means of its intellectual property
Brighter develops innovations for people
who live with a medical condition. We
develop the tools that improve the situation
and every day lives of individuals. Half of
Sweden's 4.6 million households will be
"connected" for home care or through
mobile units within five years. Brighter's
objective is to simplify, streamline and
strengthen the relationship between
patients and healthcare professionals
through the development of innovations in
the area of digital health - a market that
already today - 2015 - is valued at 160 Billion
US dollars on a global basis.

The Company's shares are listed on NASDAQOMX First North/BRIG.

- 2015-03-26 Brighter publishes press release about collaboration with Microsoft in e- and m-health.
- 2015-03-30 Brighter secures loan of 3 MSEK.

Message from the CEO.

Since 2007, Brighter has worked towards its objective of making life easier for people living with diabetes. Brighter sees that progress is moving faster than ever. Studies show that by 2020, 50 million devices will be connected to the Internet. It is estimated that 15% of these devices will consist of products in the e-health and m-health categories (m-health means mobile healthcare aided by smartphones).

Brighter's decision earlier this year to cancel the launch of Brighter One was a necessary strategic choice due to the extremely rapid rate of change we're seeing in e-health and m-health – a global market valued at USD 160 billion already this year.

Brighter must always be on the cutting edge of progress and meet the expectations of tomorrow. Therefore I look forward to developing a better and more competitive connected product with that will deliver considerably higher value than Brighter One.

Next generation Brighter One doesn't just make life easier for diabetes patients – it creates entirely new possibilities for communication between patients, their healthcare providers, their families and many other stakeholders. We call this "the Benefit Loop", where the data the patient creates about his or her health and how he or she is managing the disease is entered into other systems, guaranteeing a higher quality of treatment. If the patient wishes, he or she can contribute data and create better and faster research results, which can be a tremendous benefit to both society and the pharmaceutical industry.

Brighter is making strategic decisions to deal with this development and secure its position in the growing m-health market. Important decisions in this process are the completed development of a new quality assurance system under the supervision of Tüv Süd; the choice of our development partners Helbling and Veryday, who are leaders in their fields; and the good relationships we've built with global IT players with leading expertise in m-health.

Moreover Brighter collaborates with Microsoft and we investigate the opportunities in e- and m-health in Sweden together. Having Microsoft along, we have one of the pieces required to provide tomorrow's connected health and this is what we educate customers about.

Brighter continues to focus on diabetes treatment. According to IDF, the International Diabetes Federation, there are 388 million diabetics worldwide. 37% of them – 143 million people – are treated with insulin. IDF estimates that half of the diabetics in the world have not been diagnosed. 11% of global healthcare costs are for diabetes. Diabetes is growing by 10-15% per year. It is estimated that there will be 600 million diabetics in the world by 2030.

Brighter's mission is to make it easier for these people to manage their disease, while giving them more freedom through the opportunities that the connected next generation Brighter One will provide to individual patients and to society as a whole.

Truls Sjöstedt, CEO Brighter AB (publ).

The share.

Brighter AB (publ) is listed on the NASDAQOMX First North exchange under the abbreviation BRIG. NASDAQOMX First North is a trading platform designated as an MTF (Multilateral Trading Facility). As of 31 December 2014, 16,956,094 shares had been issued. All shares grant equal rights to the Company's profits and assets.

² In connection with the Board's decision to cancel the launch of Brighter One, a review of capitalized development costs was performed. In accordance with good accounting practices, a large portion of the expenditure paid to the former technology consultant, expenses linked to tools and components as well as some internal accrued expenses, have been judged as impaired assets and have therefore been written down.

¹ Brighter has employed new staff during 2014, which explains the increase in staff expenses.

Accounting principles.

The accounting principles applied in this yearend report are in accordance with the general advice of the Swedish Accounting Standards Board unless otherwise indicated. Brighter AB (publ) is the parent company in a group of companies, but it does not prepare any consolidated financial statements, with reference to the exemption rule in Chapter 7 Section 3 of the Swedish Annual Accounts Act (smaller groups of companies).

Annual report.

Brighter AB (publ) plans to publish its annual financial report for the 2014 financial year on the Company's website www.brighter.se in April 2014. The Brighter AB (publ) Annual General Meeting is planned for 12 June 2015. The exact date of the publication of the complete annual report will be announced no later than the summons to attend the AGM.

Auditors review.

This year-end report has not been reviewed by the Company's auditors.

Certified Advisor.

Brighter's Certified Advisor at Nasdaq OMX First North is Remium Nordic AB.

Submission of year end report.

Stockholm 31 March 2015
