Monthly Newsletter May 2018

Lund, June 1, 2018

Dear shareholder,

The month of May was marked by the annual general meeting, interim report, participation at the StrokeSyd Conference, telephone conferences with potential distributors and saying "farewell" to some of our consultants.

We started the month with the annual general meeting and the publication of our interim report. It was nice to meet some of our shareholders who participated at the AGM.

We participated at StrokeSyd's conference and annual meeting in Lund, where both Swedish and foreign researchers and doctors presented and discussed various topics such as risk factors, how to reduce the risk of stroke, acute stroke and rehabilitation.

(StrokeSyd works with research, improvements of care and innovations within the field of stroke.

Please read more on their webpage: <http://strokesyd.se/>.)

Aktiespararna (organisation for shareholders) arranged Aktiedagen in Malmö. We seized the opportunity to set up a booth and made ourselves available to answer questions and talk with many inquisitive shareholders. About 90 visitors visited Aktiedagen and another 1 255 persons followed the day on the web.

You may access QuickCool's presentation (unfortunately, only in Swedish) that was presented on Aktiedagen by clicking on the following link:

<https://www.youtube.com/watch?v=zy6V6Gds2uo&feature=youtu.be>

The front cover of Aktiespararna's event brochure depicted QuickCool's CEO, who answered questions from a curious shareholder on a previous occasion.

We ended the month by thanking some of our consultants who have helped us with mechanics, software programming, software testing and purchasing issues with a small farewell picnic in Lund's Botanical Garden. The closer we get to acquiring the CE mark, the fewer consultants we need. The company's different development phases require different competencies and we will continue to gradually phase out our talented consultants.

On http://www.quickcool.se/quickcool-ab_en.html you may find "Frequently Asked Questions" and more information about QuickCool and our solution in English.

(The website is also available in French, Spanish, Italian, Dutch and German.)

Kind regards,
Fredrik

Fredrik Radencrantz

QuickCool is a Swedish medical technology company, whose business concept is to save lives and prevent brain damage in acute brain ischemia (inadequate blood supply to the brain) by developing and providing a unique and globally patented cooling system, The QuickCool® SYSTEM. QuickCool is active in the fast growing market, targeted temperature Management (TTM), for brain-protective cooling treatment of patients that have suffered from e.g. sudden cardiac arrest and stroke. QuickCool's system protects the brain by cooling the nasal cavity and thus takes advantage of the innate heat exchanger in the nose. QuickCool's Intranasal method offers gentle and uninterrupted cooling treatment for sedated patients. QuickCool is listed on Aktietorget and conducts its business at Ideon Science Park in Lund. For more information please refer to www.quickcool.se for more information.
