

Meet Nilar at the Electronica trade fair in Munich

Electronica is the world's leading trade fair for electronic components, systems and applications. At this year's event, which will take place on November 8-11 in Munich, Germany, Nilar will participate and display its modular power technology with bi-polar NiMH energy storage. You are welcome to visit us at hall A3, booth 180. Read more at <http://electronica.de/>

About Nilar

Nilar brings you the next generation in modular power technology with the bi-polar NiMH energy storage. The unique construction of the battery delivers incredible power and reliability from a lighter, smaller and greener unit. Furthermore, the modular design allows batteries to be coupled in parallel and series to deliver the power and capacity required to meet virtually any need. Put simply, Nilar batteries deliver more from less.

Since it was founded in 2000 by two of the leading experts from the battery industry, Nilar has always sought to challenge the norms of the industry. From its two R&D departments in the USA and Sweden, the company has revolutionized the way industrial batteries are constructed – developing a unique energy storage system that can be easily scaled to fit different applications. Today, the batteries are produced at the company's state-of-the-art factory in Sweden.
