

Visit Nilar at the 27th Annual Energy Storage Association Conference and Expo in Denver, Colorado

The Energy Storage Association 27th Annual Conference and Expo is a global event promoting the adoption of competitive and reliable energy storage systems within the United States. This year's event will take place at the Colorado Convention Center from April 18-20, 2017 in Denver, Colorado. Nilar will participate and display its modular power technology with bi-polar NiMH energy storage. You are welcome to visit us at booth 215. About

Nilar is the leading provider of energy storage solution for today's infrastructure. The unique bi-polar construction of the battery pack provides reliable storage and a stable power supply from a lighter, safer and greener unit. Furthermore, the modular design allows packs to be coupled in parallel and series to deliver the power and capacity required to meet the needs of smart grid, telecom base stations, home solutions and other applications.

Since it was founded by leading experts from the battery industry, Nilar has always sought to challenge the norms of the industry. From its two R&D departments in the USA and Sweden, the company has revolutionized energy storage and power supply technology. Today, manufacturing is handled at the company's state-of-the-art factory in Sweden.
