

# New Nilar EC Series at Solar Solutions Int. fair

Between March 21st – 22nd Nilar will be showcasing together with their Dutch distributor Indutecc Industrial Solutions at the Solar Solutions Int. fair at Expo Haarlemmermeer, the Netherlands. During the fair, Nilar will be showcasing their brand new Nilar EC Series, the product series with energy compact NiMH battery packs and battery energy storage solutions. The new battery product series features the Nilar advanced NiMH battery technology, providing customers with a safer, more reliable and greener unit that can operate on a wide temperature range, with high power and long calendar lifetime. The battery features an energy optimized design that is more than 30% smaller and with more than 50% higher volumetric energy density than the previous model.

For more information about the new Nilar EC Series, enter: [www.nilar.com](http://www.nilar.com)

Visit Nilar and Indutecc in Booth D4.

## About Indutecc Industrial Solutions

Indutecc is a supplier of innovative solutions for the electro technical industry. The Nilar distributor offers total or partial solutions of top-class products for Sustainable Energy concepts like solar power, storage and energy management systems. Indutecc derive from a long history of reliability and transparency. This is reflected in their focus on long-term relationships with customers. ## About Solar Solutions Int.

The Solar Solutions Int. fair is the largest commercial platform for solar energy solutions in Benelux. The visitor target groups are installation companies, construction companies, the energy sector, housing and building managers, (semi) government, architects and consultants with key focus on decision makers. Apart from solar power, visitors can obtain more information and discover solutions for storage systems, home automation, smart energy solutions and microgrids. The fair is held at Expo Haarlemmermeer in the Netherlands between March 21st – 22nd. For further information regarding the fair, please visit: [www.solarsolutions.nl/en](http://www.solarsolutions.nl/en)

## About Nilar

Nilar brings you the next generation in modular power technology with the bi-polar NiMH energy storage. The unique construction of the battery delivers incredible power and reliability from a lighter, smaller and greener unit. Furthermore, the modular design allows batteries to be coupled in parallel and series to deliver the power and capacity required to meet virtually any need. Put simply, Nilar batteries deliver more from less.

Since it was founded in 2000 by two of the leading experts from the battery branch, Nilar has always sought to challenge the norms of the battery industry. From its two R&D departments in the USA and Sweden, the company has revolutionized the way industrial batteries are constructed – developing a unique energy storage system that can be easily scaled to fit different applications. Today, the batteries are produced at the company's state-of-the-art factory in Sweden. Read more about Nilar at: [www.nilar.com](http://www.nilar.com)
