Truck Simulation 19

It's getting frosty out there: New update introduces the northern states of the USA

Moenchengladbach/Germany, February 06, 2019 – Since November 14, 2018 players of the new mobile game **Truck Simulation 19** by astragon Entertainment and Jujubee are busy discovering the legendary US highways. Perfect for the current season now comes the first major content update, which will see virtual truckers dress up warmly to visit new territories located in the cold North of the US to expand their company and fulfil new missions.

After downloading the new update, hard-working truckers will now be able to explore the Northern states of the US and expand their logistic company into the new region. This includes the iconic federal states Wisconsin, Minnesota, Montana, Wyoming as well as North and South Dakota. Here snowy highways as well as famous cities such as Minneapolis, Milwaukee or Bismarck already await the virtual haulers.

In addition to the map extension, the content update introduces a new weather condition to **Truck Simulation 19**: For the first time, vast sections of the region will be covered by snow due to light snowfall, which can also develop to a thick flurry of snow. Truck fans can also look forward to brand-new story missions and the possibility to expand their business to new locations.
