

RELEASE APPROVED: 15th August 2016

Tulagiprochem International Engineering Contracts Ambition Supported By AVEVA

*Russian Design Institute Selects AVEVA for Integrated Engineering &
Design Software*

Tula, Russian Federation –15th August 2016: JSC Tulagiprochem, one of Russia's key players for engineering & design in the sphere of chemical manufacturing is now looking further afield at international engineering contracts. To ensure they are able to compete in the international arena and meet all necessary requirements, Tulagiprochem has just announced that it is implementing an integrated engineering and design solution from UK based software company AVEVA.

For 50 years the institute has been involved in the design, construction and commissioning of complex engineering Greenfield projects as well as Brownfield reconstruction, modernization and decommissioning work. These projects involve multiple disciplines working together on complex designs using vast amounts of data with the potential for information chaos, negatively impacting project timelines and profitability.

"We believe that turning to innovative IT technologies is a necessary step in the development of our business," Oleg V. Drobotuschenko, a Director at Tulagiprochem explained. "We fully realized the challenges we might have at the beginning of the process, however, the training was very successful and now the implementation is concluded the results and benefits are exceptional."

In order to improve the efficiency of its engineering processes Tulagiprochem selected AVEVA to supply a fully integrated engineering, design and data management solution including the recently launched AVEVA Everything 3D software. This will enable an integrated approach that will speed up all engineering & design activities and guarantee effective collaboration between participants of a project.

Tulagiprochem has confirmed that training on the software has been completed and pilot projects using the AVEVA solution have commenced.

About AVEVA

For almost 50 years, AVEVA software has enabled the creation of some of the world's most complex power and process plants, vessels and offshore facilities. AVEVA's Digital Asset approach ensures there is always an accurate digital representation of each physical asset. This allows engineering contractors, Owner Operators and shipbuilders to work more safely, more efficiently and with less risk throughout the life cycle of their projects and operations. AVEVA is the proud winner of the Frost and Sullivan 2015 Global Engineering Information Management Solutions Competitive Strategy Innovation and Leadership Award.
