

SvenskaFans launches brand new App

SvenskaFans, Swedens largest sports community online, launches a new app for fans. The app includes multiple functions including livescore and a customized feed for all users to keep track on their favorite team.

- It's the perfect app for all supporters, says SvenskaFans.com Editor in Chief Linus Sunnervik.

The process on getting the app out on the market has been a project for over two years, where finetuning and customization has been a key point of focus. The update includes major new functions that makes life easier for fans that wish to follow their favorite teams – independent if it's football, hockey or bandy.

The user gets notifications on when a team scores, lineups prior to games and statistics from all major games. It is also possible for the user to customize their own newsfeed to not miss out on major events or latest buzz about their favorite team. In addition, it is easy to consume the latest and top commented topics in the forums.

As a supporter for a team you get a one-stop-shop for everything. The app is a foundation for the work going forward in developing SvenskaFans. An investment that will continue to be on full speed during 2021, says SvenskaFans.com Editor in Chief Linus Sunnervik.

Here you can download the SvenskaFans app:

- » [App Store](#)
- » [Google Play](#)

SvenskaFans is a part of EverySport Media Group. The login for SvenskaFans is the same for all other editorial platforms within the group. These include Hockeysverige (Sweden's largest site about hockey), FotbollDirekt (one of the leading football sites in Sweden), Innebandymagazinet (Sweden's largest site about floorball) and PadelDirekt (Sweden's largest site about padel).
