### **About Cereno Scientific AB**

Cereno Scientific is developing a novel preventive medicine to treat thrombosis-related disease, based on the body’s own intelligent clot-busting system. Cardiovascular disease is currently the leading cause of death worldwide. Current therapies are connected to an increased risk of bleeding and, as a result, low effectiveness due to lower dosing levels. In turn, this leads to a high risk of new blood clots. Cereno Scientific’s drug candidate, CS1, is expected to provide a possibility for an effective prevention of thrombosis and a lower risk for serious bleeding complications than with current blood thinning therapies. CS1 is an innovative controlled release formulation of a known compound and, as such, is expected to have a relatively short development time. The Gothenburg-based company is located in AstraZeneca’s BioVentureHub and is supported by GU Ventures. Cereno Scientific’s B share has been listed on Spotlight Stock Market since June 2016 with the ticker CRNO B, ISIN SE0008241558.

*This information is such that Cereno Scientific AB is required to make public in accordance with the EU’s market abuse regulation (MAR). The information was made available publically by the Company’s contact person on September 13th 2018.*
