### **About Cereno Scientific AB**

Cereno Scientific is developing novel preventive medicine to treat thrombosis-related disease, based on the body's own intelligent clot-busting system. Cardiovascular disease is currently the leading cause of death worldwide. Current therapies are connected to an increased risk of bleeding and, as a result, low effectiveness due to lower dosing levels. In turn, this leads to a high risk of new blood clots. Cereno Scientific's drug candidate, CS1, is expected to provide a possibility for an effective prevention of thrombosis and a lower risk for serious bleeding complications than with current blood thinning therapies. CS1 is an innovative controlled release formulation of a known compound, and as such is expected to have a relatively short development time. In parallel with the development of CS1, Cereno Scientific develops CS014, a preclinical phase compound with promising and innovative characteristics in cardiovascular diseases. The Gothenburg-based company is located in AstraZeneca's BioVenture Hub and is supported by GU Ventures. Cereno Scientific's B share has been listed on Spotlight Stock market since June 2016 with the ticker CRNO B, ISIN SE0008241558.
