

Press release 7 October 2021

## Travis and Tier initiate new collaboration

**Travis, the smart travel planner for the mobility solutions of the future, is commencing a collaboration with Tier, which has excellent geographic coverage with electric scooters in Stockholm. With this collaboration in place, Travis users will be able to book and pay for their electric scooter trips directly in Travis. The new offering will be an important addition to the ecosystem of shared and sustainable travel options already contained in Travis – all of Stockholm’s modes of transport in a single app.**

Travis connects travel planning for public transport, car sharing, electric scooters, bikes and taxis with real-time travel information and smart, effective on-demand services, such as in-app ticket purchases. The specific journey determines the mode of transport and not the other way round.

Travis is continuing to grow to include new services, functions, collaborations and users, and the app has now become the largest and most rapidly growing platform for Mobility as a Service (MaaS) in Sweden.

“We try to constantly offer more and better services for smart, sustainable mobility to all Travis users. For this reason, it is really satisfying to now commence collaboration with Tier, which shares our ambition and vision for the mobility solutions of the future,” says John Strand, Managing Director of Nobina Travis.

“The collaboration with Travis is fully aligned with Tier’s vision for the city of the future, where it should be easy to get around central Stockholm and be more convenient to choose environmentally friendly transport than making short and unnecessary car journeys,” says August Svedenstedt, Regional Manager Sweden for Tier.

### **About Tier in Sweden**

TIER Mobility is Europe’s leading shared micro-mobility provider, with a mission to Change Mobility for Good. By providing people with a range of shared, light electric vehicles, from e-scooters to e-bikes and e-mopeds, powered by a proprietary Energy Network, TIER helps cities reduce their dependence on cars. Founded in 2018 by Lawrence Leuschner, Matthias Laug and Julian Blessin, TIER is headquartered in Berlin and currently operates in more than 100 cities across 12 countries in Europe and the Middle East. With a focus on providing the safest, most equitable and most sustainable mobility solution, TIER has been climate neutral since 2020. TIER’s investors include SoftBank Vision Fund 2, Mubadala Capital, Northzone, Goodwater Capital and White Star Capital.

### About Travis

Nobina Travis is part of the Nobina Group, the largest public transport company in the Nordic region.

We are the Nordic region's largest public transport operator, with 12,000 employees across four countries. Every day, all year round, one million people choose to travel more sustainably with us. From north to south, in urban and in rural areas. To the next bus stop, or all the way home. Together with our passengers and clients, we are big enough to make a real difference. From a welcoming greeting and a comfortable bus journey, to new smart technology that contributes to more fossil-free travel. A unique opportunity to bring about change.

The Group operates in Sweden, Norway, Denmark and Finland and reported sales of almost SEK 11 billion in 2019. In the Swedish and Danish markets, Nobina also operates service traffic under the Samtrans and Örslev brands, respectively. Nobina is listed on Nasdaq Stockholm.

Together, we keep society moving every day.
