

Press release 13 February 2026

Nobina expands in the Turku region with new contract for city transport

Nobina has been awarded a new contract by Föli to operate and develop city transport services in Turku. The agreement marks an important step in the region's transition toward more sustainable public transport, with 23 fully electric tri-axle buses – entering service when the contract begins in July 2027.

Running over eight years, with an option for an additional two years, the contract strengthens Nobina's presence in southwest Finland. The modern, high-capacity and emission-free buses will contribute to quieter streets, cleaner air, and an improved travel experience for passengers.

"We are very pleased with Föli's continued trust. This contract allows us to further develop public transport in Turku together with our client and the region's passengers. Advancing electrification is essential for creating sustainable, safe, and attractive journeys — both today and for future generations", says Topi Simola, Managing Director, Nobina Finland.

The new buses are designed to meet the high-capacity requirements of city operations and will enhance comfort while significantly reducing noise levels. With this contract, Nobina takes another meaningful step in supporting the region's climate ambitions while keeping the needs and daily lives of travellers at the centre.

The award decision may be appealed until 26 February 2026.

About Nobina

This is Nobina. We are the Nordic region's largest public transport operator, with 15,000 employees across four countries. Every day, all year round, one million people choose to travel more sustainably with us. From north to south, in urban and in rural areas. To the next bus stop, or all the way home. Together with our passengers and clients, we are big enough to make a real difference. From a welcoming greeting and a comfortable bus journey, to new smart technology that contributes to more fossil-free travel. A unique opportunity to bring about change.

The Group operates in Sweden, Norway, Denmark and Finland and reported sales of approximately SEK 14 billion in 2024/2025. In the Swedish market, Nobina also operates special needs transportation under the Samtrans, Göteborgs Buss, and Telepass brands, respectively.

Together, we keep society moving every day.
