

Flowscape wins new orders in Australia

One of Flowscape's global customers is expanding their installations in Australia with a new office in Brisbane and a complementing order for their Sydney office. The Flowscape solution will be an important part for a safe return to the offices after the Covid-19 lock down. The order value is 1.3 MSEK first year and thereafter SEK 300,000 annually.

"Over the past month, we have seen a great interest from several countries for our new Covid-19 solution for safe social distancing at the office. With this order, our system will be used in two large offices in Australia with a total of over 1000 people employed. We have already delivered our solution to their Sydney office and we use this order as proof that they are satisfied, and that the solution is easy to implement and creates value" says Peter Reigo, CEO and founder.

This large global North American consulting company chose Flowscape a year ago, in competition with several other strong suppliers. Today, Flowscape solutions are implemented at several offices in the United States and now Australia. This order includes a new solution for the Brisbane office and a complement to the existing solution at the Sydney office. Both offices now have Flowscape smart office solution for room booking, desk management, colleague finder, wayfinding, statistics and also busy lights for their work desks. The customer plans to use Flowscape's latest desk management solution to block work desks, book seats, signal the cleaning status of locations and monitor to avoid the spread of Covid-19 in the offices.
