

FlowScape receives first order in Africa

A customer in South Africa places an order for installation of FlowScape's Covid-19 solution at their offices in Johannesburg and Cape Town. With this order, FlowScape can add another country to the about 30 countries where they have installations. The order value is 110,000 SEK the first year and thereafter 70,000 SEK annually.

"We are delighted to see that FlowScape is getting recognized around the world. With this order of our Covid-19 solution we see that this type of digital solution is globally demanded. It is important with social distancing and a safe return to the office everywhere." says Peter Reigo, CEO and founder.

The customer has decided for FlowScape's Desk Management software solution for approximately 200 workplaces at their offices in Johannesburg and Cape Town. The solution includes a mobile app, web app, kiosk screen app and an analytics tool to see the use of the office's workplaces. With the solution, the customer can create a safe process back to the office by blocking every other desk for social distancing, introduce booking of desks for a full working day to avoid staff changing places and marking of used desk for disinfect. In the analytics tool, the customer can also follow how staff will return to the office and they can track infection if someone is tested positive for Covid-19.
