

# TalkPool wins Maintenance contract in the Netherlands

Wednesday, July 5<sup>th</sup> 2017

TalkPool has signed a new contract with Cellnex (an international tower company) for Preventive Maintenance of 720 radio sites in the Netherlands. The contract has been signed by Camouflage BV, the local subsidiary of TalkPool in the Netherlands.

The contract execution has started last week. The contract period is 3.5 years, and has a total estimated value of Euro 1.5 m€.

This contract is the first of its kind for TalkPool in the Netherlands, and will create various opportunities for additional maintenance contracts in the country.

“This new contract is a successful proof of TalkPool’s capability to autonomously grow its local business, mainly because of the high quality service levels. We believe that the market for field maintenance services is important to TalkPool, also because of the relative long duration of these contracts.”, comments Erik Strömstedt CEO of Talkpool.

## About Talkpool:

TalkPool builds, maintains and improves telecommunication networks globally. Through its cutting-edge technical expertise, long experience and agile business model, TalkPool offers global telecom vendors and operators high-quality services on short notice no matter the location. Moreover, TalkPool is one of few companies with actual solutions and contracts in place in the exciting IoT-market. Remium Nordic AB is TalkPool’s Certified Advisor for Nasdaq First North.

## About Cellnex Telecom:

Cellnex is the main independent European operator of wireless communications infrastructure, with a total portfolio of more than 21,000 sites, including the DAS (distributed antenna systems) nodes managed by CommsCon and the assets that are currently being integrated in France. In 2016 Cellnex Telecom obtained revenues of € 707 million (+15%) and EBITDA of € 290 million (+23%). The company is present in Italy, Spain, France, the Netherlands and the UK.

Cellnex’s business is structured around three areas: Mobile telephony infrastructures; audiovisual broadcasting networks; and security and emergency service networks and solutions for smart urban infrastructure and services management (smart cities and the “Internet of Things” (IoT)).”
