

## PRESS RELEASE

Stockholm  
19 January 2026

### **GomSpace Strengthens Business Unit Structure and Executive Team for 2026**

*GomSpace Strengthens Its Business Unit Structure to Capture Growth Across the Space Value Chain and announces a strengthened Executive Team for 2026 with clear accountability and focus.*

GomSpace has structured its operations into five complementary business units, each addressing distinct customer segments while reinforcing a coherent end-to-end space capability. Together, these business units position GomSpace to scale profitably, capture institutional and commercial demand, and support Europe's growing need for sovereign, secure, and advanced space solutions.

#### **1. Products Business Unit – Scaling a Strong Product Portfolio**

The Products Business Unit grows GomSpace's established portfolio of standardized satellite subsystems. Building on strong market positions and extensive flight heritage, the unit serves system integrators and satellite operators globally. The strategic focus is on increasing volume, margins, and repeat business through product standardization, industrialization, and scale.

#### **2. Satellite Systems Business Unit – Delivering Satellites at Scale**

The Satellite Systems Business Unit designs, assembles, and delivers complete satellite systems. The unit focuses on repeatable and scalable execution to meet growing demand for multi-satellite and constellation programs. Key priorities include delivery predictability, cost efficiency, and industrialized production.

#### **3. National & Defense Solutions Business Unit – End-to-End Sovereign Capabilities**

The National & Defense Solutions Business Unit delivers turnkey space solutions for government customers across defense and civil domains. The unit integrates satellites, ground systems, operations, and data services to support national security, surveillance, and resilience, positioning GomSpace as a long-term strategic partner.

#### **4. Advanced Missions Business Unit – Complex and Strategic Space Programs**

The Advanced Missions Business Unit addresses technologically complex and strategically important space missions, including European and national institutional programs. Building on GomSpace's deep engineering heritage, the unit advances new technologies, supports capability maturation, and strengthens long-term strategic positioning.

#### **5. North America Business Unit – Expanding Presence in the World's Largest Space Market**

The North America Business Unit operates as a dedicated commercial and customer-facing unit focused on the world's largest space market. It leverages and sells solutions, satellite systems, and technologies from across GomSpace's other business units, while strengthening local partnerships and market access.

Together, these five business units form a coherent and scalable operating model—combining products, satellite systems, national and defense solutions, advanced missions, and a strong North American presence—positioning GomSpace for sustained growth in a rapidly evolving global space market.

#### **Leading the Journey: GomSpace's Executive Team with Clear Focus and Accountability**

CEO, Carsten Drachmann (*Denmark*)

CFO, Troels Dalsgaard (*Denmark*)

CCO, Thomas Pfister (*France*)

COO, Søren Therkildsen (*Denmark*)

VP Products BU, Jane Rygaard (*Denmark*) – from April 1

VP Satellite Systems, Oliver Schiewe (*Denmark*)

VP National & Defence Solutions, Lars Alminde (*Denmark*)

VP Advanced Missions, Edgar Milic (*Luxembourg*)

VP North America BU, Slava Frayter (*US*)

The executive team will lead a truly international organization with more than 230 engaged employees globally, spanning over 25 nationalities. The five Vice Presidents each carry full P&L accountability for their Business Units, aligned to distinct addressable market segments.

**About GomSpace Group AB**

Founded in 2007, GomSpace is a global provider of small satellite solutions with customers in more than 60 countries. The company's business operations are mainly conducted through the wholly owned Danish subsidiary, GomSpace A/S, with headquarters and operational facilities in Aalborg, Denmark. GomSpace also has key operations in Luxembourg, France, and the United States. GomSpace develops and delivers advanced systems and services that enable governments, commercial enterprises, and research institutions to achieve their objectives in space. The company's expertise covers satellite subsystems, complete small satellite missions, and satellite operations, providing solutions that support smarter, faster, and more affordable access to space.

The company is listed on Nasdaq First North Premier Growth Market in Stockholm under the ticker GOMX. FNCA Sweden AB is the Company's Certified Adviser. For more information, please visit [www.gomspace.com](http://www.gomspace.com).
