

ESG insight

EPISURF MEDICAL

Strong long-term data

The company today announced strong long-term follow-up data from the initial Episealer trial done in Sweden. We previously saw 24-month data; the patients have now been followed for 75 months and the data still looks excellent. This is important for Episurf Medical, as many doctors as well as payers request long-term follow-up for the implant system to be included in treatment algorithms and reimbursement systems. We reiterate our fair value of SEK1.3–3.9.

Long-term follow-up from first 10 patients treated. Episurf Medical reported the long-term follow-up for the first 10 patients treated with the Episealer implant system. These patients have now been followed for at least 75 months, and the outcome is just as good as after the last follow-up at 24 months. The basic result is that the positive outcomes seen at the 24-month follow-up remain after 75 months. We believe the lead investigator is set to publish the findings in a journal during the autumn.

Strong 24-month data maintaining efficacy at 75 months. As a reminder, the trial was conducted in 10 Swedish patients at three different clinics between December 2012 and November 2014. At the 24-month follow-up, the authors saw an improvement in all the scales used to assess the procedures. In particular, there was a statistically significant improvement in the VAS scale ($p \leq 0.001$), Tegner ($p = 0.034$), KOOS subscale ADL ($p = 0.0048$), sports and recreation ($p = 0.034$), and quality of life ($p = 0.037$). There were no revisions or implant migrations at 24 months. We have not yet had all the details (due to come in connection with publication of the findings), but believe the statement that all the positive findings seen at 24 months remain at 75 months indicates we should expect results at least as good when this trial is published.

These patients lack treatment options. As these patients are too old for biological treatments and too young for full knee replacements (median age at surgery: 42.5 years), there are no real options for this group. However, in order to be included in reimbursement systems and treatment algorithms at different clinics, long-term follow-up of the outcomes is usually very important. Hence we see this announcement as very positive for the ongoing market introduction of the implant system. We reiterate our fair value of SEK1.3–3.9.

ANALYSTS

Patrik Ling

Please see the last two pages for important information. This research report was not produced in the US. Analysts employed by non-US affiliates are not registered/qualified research analysts with FINRA in the United States.

Overview

Valuation (SEK)

Source: DNB Markets

Downside risks to our fair value

- We believe the largest risk relates to Episealer® sales growth. Hence, our bear-case scenario assumes weaker sales than our base-case scenario. Even weaker sales would be a negative.
- We believe the company will need additional financing to reach our forecasts, and this might not be available at acceptable terms.
- The US IDE trial might take longer than expected to complete and be more expensive than estimated.
- The Covid-19 pandemic might negatively affect short-term demand.

Source: DNB Markets

DNB Markets estimates

- We believe our base-case scenario includes reasonable sales growth, even though the market has been disappointed by historical sales.
- The company has significantly more clinical data now than at the time of the IPO, which supports the case.
- We assume the company will complete the US IDE trial and out-license the Episealer® system to a US partner. We have not factored in an upfront payment but instead have estimated that the company receives a royalty on sales.

Source: DNB Markets

Valuation methodology

- We continue to primarily use a DCF, with a base-case long-term growth rate of 1%, a terminal EBIT margin of 45%, and a WACC of 11%.
- In our bull-case scenario we assume 25% higher sales growth than in our base-case scenario.
- In our bear-case scenario we use 25% lower sales growth than in our base-case scenario.

Source: DNB Markets

Upside risks to our fair value

- Sales might be stronger than we forecast, as it has clearly more clinical documentation than in the past.
- A US partnership might include better terms than we expect.
- The company could become a takeover target for a larger orthopaedic implant company.

ESG overview

Sustainability assessment

	Positive	Negative
Conclusions	<ul style="list-style-type: none"> ■ Episurf Medical's products aim to improve knee health in younger patients with well-defined arthritic injuries. The main drivers for the company are the combination of demographic changes and a lack of suitable alternatives for patients deemed too young for a total knee replacement. ■ The implants are individually designed to the patient's anatomy and injury, increasing the likelihood of a successful treatment outcome. ■ We believe that general ESG trends could benefit Episurf Medical over time. 	<ul style="list-style-type: none"> ■ The company is establishing a new treatment paradigm for knee injuries, but this takes time. Despite the poor treatment alternatives for younger patients, it still takes time to educate surgeons about the new treatment. ■ Treatment growth is to a large extent dependent on clinical outcome data, and the company is only now ready with its documentation. This historical lack of data has slowed market uptake.
Actions being taken by company	<ul style="list-style-type: none"> ■ Tailoring implants as well as surgical instruments means a better fit with the patients' needs and a reduced risk of revision surgery. ■ The company mainly addresses the UN sustainability goal number 3 "Good health and well-being". 	<ul style="list-style-type: none"> ■ The individualisation leads to a higher degree of single-use products (especially related to the surgical tools). ■ Although the waste increases due to a high degree of single-use products, the high success rate and the low revision rate should compensate for this.

Key ESG drivers

Short-term

- All the company's products, in one way or the other, are aimed at improving health among patients. Hence they all address the UN's goal 3 of "Good health"
- The Episealer implant system offers treatment to a group of patients who lack suitable alternatives. The documentation of clinical efficacy is rapidly increasing which we believe will make it easier to convince more orthopaedic surgeons to test the products and ultimately offer this solution to more patients.
- These patients are to a large extent treated with painkillers long-term; a successful Episealer treatment can reduce the need and risks associated with long-term painkiller usage.
- There has been a lack of clinical documentation regarding the outcome for the Episealer implant system but over the past year more data has emerged, which looks compelling.
- As this is a completely new way of treating the patients it takes time to educate orthopaedic surgeons in this method of treatment.

Long-term

- Getting younger patients (c35–40 years) back into good knee health also means that more can resume work, benefiting the overall economy as well as for the patients' well-being.
- Cost effectiveness of care should increase in the future as growth in total resources for healthcare is likely to be slower than that in demand.
- Access to healthcare differs globally, and patient needs vary from market to market. Episurf Medical's products mainly cater to patients in more developed markets.
- New drugs or alternative treatments could have a negative impact on certain therapies, making some of Episurf Medical's current equipment obsolete.

Sustainability assessment

	Risk	Company's risk mitigation
Transition risks		
Policy and legal	<ul style="list-style-type: none"> Changes in reimbursement systems can have a significant impact on its operations from time to time. Other regulations such as MRD and FDA approvals can take time and affect the company's ability to market its products. 	<ul style="list-style-type: none"> All products have been recently re-certified in Europe, meaning that certification according to the MDR is not critical until 2024.
Technology	<ul style="list-style-type: none"> The Episealer implant system and surgical instruments are difficult for the competition to copy. There are other implant systems available, but they are not patient-specific. 	<ul style="list-style-type: none"> There are no direct technical barriers left; rather the system is now rolled out in the market and also developed for other types of cartilage damage.
Market	<ul style="list-style-type: none"> The company sells direct in Europe, which is a slow process. In the US market the company will most likely enter into an agreement with a partner; this can be difficult to achieve. 	<ul style="list-style-type: none"> The company focuses on certain markets and regions in markets to establish the system as a standard treatment. Discussions with potential partners are ongoing.
Reputation	<ul style="list-style-type: none"> A rising revision rate would be a clear negative. We see a potential risk in new surgeons using the system without sufficient training. 	<ul style="list-style-type: none"> As cases are scanned and sent to the company for manufacture, this makes it easy for it to detect whether a potential patient is unsuitable.
Physical risk		
Acute	<ul style="list-style-type: none"> Any manufacturing faults in an implant could have serious implications for a patient. 	<ul style="list-style-type: none"> Quality control is imperative in the entire manufacturing chain.
Chronic	<ul style="list-style-type: none"> The launch of new biological technology that makes the implant solution outdated. 	<ul style="list-style-type: none"> There is the potential for the company to use its technology for other applications.

Source: DNB Markets

Sustainability assessment

	Opportunities	Company's utilisation of opportunity
Resource efficiency	<ul style="list-style-type: none"> By manufacturing patient-specific implants and instruments, there will be only a limited amount of waste. On the other hand, the surgical tools are single-use products and cannot be re-used. 	<ul style="list-style-type: none"> The single-use feature limits the risk of an implant being unsuitable in the surgical situation. This reduces the need for revisions.
Products/Services	<ul style="list-style-type: none"> The individualised products result in a precise fit to the patient's injury. The software planning tools also eliminate the risk of carrying out the procedure on unsuitable patients. 	<ul style="list-style-type: none"> The company sometimes advises against surgery after it receives the patient's images, thereby increasing the likelihood of a positive outcome.
New markets	<ul style="list-style-type: none"> The company is expanding its market presence in Europe and will seek a marketing partner for the US market. 	<ul style="list-style-type: none"> The company is currently conducting a large (c180 patients) IDE trial in the US.
Supply chain resilience	<ul style="list-style-type: none"> The production is still relatively costly but, as volumes expand, economies of scale should kick in. It has capacity to significantly increase volumes without any major investments. 	<ul style="list-style-type: none"> The company uses CMOs to help with a large part of the manufacturing process.

Important Information

Company: Episurf Medical
 Coverage by Analyst: Patrik Ling
 Date: 08/9/2020

This report has been prepared by DNB Markets, a division of DNB Bank ASA. DNB Bank ASA is a part of the DNB Group. This report is based on information obtained from public sources that DNB Markets believes to be reliable but which DNB Markets has not independently verified, and DNB Markets makes no guarantee, representation or warranty as to its accuracy or completeness. This report does not, and does not attempt to, contain everything material which there is to be said about the Company. Any opinions expressed herein reflect DNB Markets' judgement at the time the report was prepared and are subject to change without notice. The report is planned updated minimum every quarter.

Any use of non-DNB logos in this report is solely for the purpose of assisting in identifying the relevant issuer. DNB is not affiliated with any such issuer.

This report is for clients only, and not for publication, and has been prepared for information purposes only by DNB Markets, a division of DNB Bank ASA.

This report is the property of DNB Markets. DNB Markets retains all intellectual property rights (including, but not limited to, copyright) relating to the report. Sell-side investment firms are not allowed any commercial use (including, but not limited to, reproduction and redistribution) of the report contents, either partially or in full, without DNB Markets' explicit and prior written consent. However, buy-side investment firms may use the report when making investment decisions, and may also base investment advice given to clients on the report. Such use is dependent on the buy-side investment firm citing DNB Markets as the source.

Risk warning – generally high risk

The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.

Conflict of interest

This report has been commissioned and paid for by the company, and is deemed to constitute an acceptable minor non-monetary benefit as defined in MiFID II.

Readers should assume that DNB Markets may currently or may in the coming three months and beyond be providing or seeking to provide confidential investment banking services or other services to the company/companies

Legal statement

These materials constitute research as defined in section 9-27 (1) of the Norwegian Securities Trading Regulations (Norwegian: verdipapirforskriften), and are not investment advice as defined in section 2-4(1) of the Norwegian securities trading act (Norwegian verdipapirhandeloven). It constitutes an acceptable minor non-monetary benefit as defined in MiFID II.

The analyst hereby certifies that (i) the views expressed in this report accurately reflect that research analyst's personal views about the company and the securities that are the subject of this report, and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report. DNB Markets employees, including research analysts, may receive compensation that is generated by overall firm profitability. Confidentiality rules and internal rules restricting the exchange of information between different parts of DNB Markets/DNB Bank ASA or the DNB Group are in place to prevent employees of DNB Markets who are preparing this report from utilizing or being aware of information available in the DNB Group that may be relevant to the recipients' decisions. DNB Markets and the DNB Group have incorporated internal rules and regulations in order to avoid any potential conflicts of interest.

The Report has been prepared by DNB Markets, a division of DNB Bank ASA, a Norwegian bank organized under the laws of the Kingdom of Norway and under supervision by the Norwegian Financial Supervisory Authority, The Monetary Authority of Singapore, and on a limited basis by the Financial Conduct Authority and the Prudential Regulation Authority of the UK, and the Financial Supervisory Authority of Sweden. Details about the extent of our regulation by local authorities outside Norway are available from us on request.

It is issued subject to the General Business Terms for DNB Markets and information about the terms is available at www.dnb.no. For requests regarding the General Business Terms of the Singapore Branch of DNB Bank ASA, please contact +65 6212 6144. Information about the DNB Group can be found at www.dnb.com. DNB Markets is a member of The Norwegian Securities Dealers Association, which has issued recommendations and market standards for securities companies. The Association's Internet address where the recommendations and market standards can be found is: www.vpff.no. This report is not an offer to buy or sell any security or other financial instrument or to participate in any investment strategy. No liability whatsoever is accepted for any direct or indirect (including consequential) loss or expense arising from the use of this report. Distribution of research reports is in certain jurisdictions restricted by law. Persons in possession of this report should seek further guidance regarding such restrictions before distributing this report. The report is not to be distributed or forwarded to private persons in the UK or the US. Please contact DNB Markets at 08940 (+47 915 08940) for further information and inquiries regarding this report, including an overview on all recommendations from DNB Markets over the last 12 Months according to Market Abuse Regulations.

Additional information for clients in Singapore

The report has been distributed by the Singapore Branch of DNB Bank ASA. It is intended for general circulation and does not take into account the specific investment objectives, financial situation or particular needs of any particular person. You should seek advice from a financial adviser regarding the suitability of any product referred to in the report, taking into account your specific financial objectives, financial situation or particular needs before making a commitment to purchase any such product. You have received a copy of the report because you have been classified either as an accredited investor, an expert investor or as an institutional investor, as these terms have been defined under Singapore's Financial Advisers Act (Cap. 110) ("FAA") and/or the Financial Advisers Regulations ("FAR"). The Singapore Branch of DNB Bank ASA is a financial adviser exempt from licensing under the FAA but is otherwise subject to the legal requirements of the FAA and of the FAR. By virtue of your status as an accredited investor or as an expert investor, the Singapore Branch of DNB Bank ASA is, in respect of certain of its dealings with you or services rendered to you, exempt from having to comply with certain regulatory requirements of the FAA and FAR, including without limitation, sections 25, 27 and 36 of the FAA. Section 25 of the FAA requires a financial adviser to disclose material information concerning designated investment products which are recommended by the financial adviser to you as the client. Section 27 of the FAA requires a financial adviser to have a reasonable basis for making investment recommendations to you as the client. Section 36 of the FAA requires a financial adviser to include, within any circular or written communications in which he makes recommendations concerning securities, a statement of the nature of any interest which the financial adviser (and any person connected or associated with the financial adviser) might have in the securities. Please contact the Singapore branch of DNB Bank ASA at +65 6212 6144 in respect of any matters arising from, or in connection with, the report. The report is intended for and is to be circulated only to persons who are classified as an accredited investor, an expert investor or an institutional investor. If you are not an accredited investor, an expert investor or an institutional investor, please contact the Singapore Branch of DNB Bank ASA at +65 6212 6144. We, the DNB group, our associates, officers and/or employees may have interests in any products referred to in the report by acting in various roles including as distributor, holder of principal positions, adviser or lender. We, the DNB group, our associates, officers and/or employees may receive fees, brokerage or commissions for acting in those capacities. In addition, we, the DNB group, our associates, officers and/or employees may buy or sell products as principal or agent and may effect transactions which are not consistent with the information set out in the report.

In the United States

Each research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the views expressed in this report accurately reflect that research analyst's personal views about the company and the securities that are the subject of this report; and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

The research analyst(s) named on this report are foreign research analysts as defined by FINRA Rule 1050. The only affiliate contributing to this research report is DNB Bank through its DNB Markets division ("DNB Markets/DNB Bank"); the foreign research analysts employed by DNB Markets/DNB Bank are named on the first page; the foreign research analysts are not registered/qualified as research analysts with FINRA; foreign research analysts are not associated persons of DNB Markets, Inc. and therefore are not subject to the restrictions set forth in FINRA Rules 2241 and 2242 regarding restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

This is a Third Party Research Report as defined by FINRA Rules 2241 and 2242. Any material conflict of interest that can reasonably be expected to have influenced the choice of DNB Markets/DNB Bank as a research provider or the subject company of a DNB Markets/DNB Bank research report, including the disclosures required by FINRA Rules 2241 and 2242 can be found above.

This report is being furnished solely to Major U.S. Institutional Investors within the meaning of Rule 15a-6 under the U.S. Securities Exchange Act of 1934 and to such other U.S. Institutional Investors as DNB Markets, Inc. may determine. Distribution to non-Major U.S. Institutional Investors will be made only by DNB Markets, Inc., a separately incorporated subsidiary of DNB Bank that is a U.S. broker-dealer and a member of the Financial Industry Regulatory Authority ("FINRA") and the Securities Investor Protection Corporation ("SIPC").

Any U.S. recipient of this report seeking to obtain additional information or to effect any transaction in any security discussed herein or any related instrument or investment should contact DNB Markets, Inc., 200 Park Avenue, New York, NY 10166-0396, telephone number +1 212-551-9800.

In Canada

The Report has been distributed in reliance on the International Dealer Exemption pursuant to NI 31-103 subsection 8.18(2) and subsection 8.18(4)(b). Please be advised that: 1. DNB Bank ASA (DNB Markets) and DNB Markets, Inc. are not registered as a dealer in the local jurisdiction to make the trade. We provide our services in Canada as an exempt international dealer. 2. The jurisdiction of DNB Bank ASA (DNB Markets) and DNB Markets, Inc.'s head office is Norway. 3. There may be difficulty enforcing legal rights against DNB Bank ASA (DNB Markets) and DNB Markets, Inc. because all or substantially all of their assets may be situated outside of Canada. 4. The name and address of the agent for service of process for DNB Bank ASA (DNB Markets) and DNB Markets, Inc. in the local jurisdiction is:
