Episurf Medical expands into the Polish Market

Episurf Medical (Nasdaq: EPIS B) today announces that the company will enter the Polish market. Access to the Polish market will be enabled through co-operation with a local partner, and the local product registration, initially of the Episealer® knee implants, is in its final phase.

"On the back of the strong Episealer® clinical results that are currently being presented throughout Europe, we are focusing our expansion strategy towards activities that create prerequisites for future growth. Enabling access to the Polish market is one such activity. There are an estimated 10,000 – 15,000 knee replacement surgeries performed annually in Poland, and we have assessed the commercial opportunities for us as being attractive. We look forward to helping patients in Poland, who suffer from early knee osteoarthritis, to recover from severe knee pain" says Pål Ryfors, CEO Episurf Medical.
