

Presentation of Episealer® at the ICRS Focus Meeting “One Step Cartilage Repair” in Rome, 5-7 of June

Professor Mats Brittberg, Göteborg's University, has been invited to present the Episealer® knee technology at the ICRS Focus Meeting “One Step Cartilage Repair” in Rome, 5-7 of June 2019. In line with what Episurf Medical previously has communicated, mini-implants and alternative treatment options for focal cartilage and bone defects are generating increased attention within the orthopaedic industry and a presentation about Episealer® is a topic at the scientific program at this meeting.

“The Episealer® technology is very exciting for a challenging group of patients and I look forward to presenting the technology and the promising results at the meeting in Rome. It's encouraging to see the early results from several European countries. From a personal point of view, I am very interested in the preoperative damage report which is unique for Episurf” says Professor Mats Brittberg.

For full program, see <https://cartilage.org/icrs-focus-meeting-one-step-cartilage-repair>. For an overview of the industry conferences attended by Episurf Medical, see link. (www.episurf.com/healthcare-professionals/conferences).
