

## Episurf Medical reaches milestone of 800 implants

Episurf Medical (NASDAQ: EPIS B) today announces that the company has reached another milestone by the planning of the 800th surgery with the Episealer® knee implant. The reported implant revision rates remain low and presented clinical data is showing significant improvements for the Episealer® patients. About 340 patients have currently had the Episealer® implant for more than two years and about 50 patients for more than five years. Several scientific publications evaluating the technology are being prepared for publication.

*"We are looking forward to reaching out to a larger group of surgeons and make the Episealer® technology available for more patients as additional clinical evidence is available from this group of patients"* says Pål Ryfors, CEO Episurf Medical.
