

First Episealer® surgery planned in India

Episurf Medical (Nasdaq: EPIS B) today announces that the first surgery in India with the knee implant Episealer® has been scheduled.

India presents a unique opportunity to enter a vast market with the Episealer® technology. Episurf Medical has worked closely with Prof. Niek van Dijk and Prof. Doctor João Espregueira-Mendes who have aided in introducing local orthopaedic surgeons to the Episealer® technology. Both are advisors to Episurf Medical.

"We are now offering the Episealer® technology to our Indian customers, and we are pleased with having the first surgery in India scheduled. Before the pandemic, we had a clear focus on this market, but naturally, we had to more or less stop the activities for a while. However, now activities have started again, this is an important milestone for us. The Indian market represents a significant opportunity for us, and as we take our first steps here, we are already structuring plans to scale up in this important market", says Pål Ryfors, CEO Episurf Medical.
