

PRESSRELEASE
2018-08-13

Eyeonid Group AB and Willis Towers Watson (Willis AB) has today signed an agreement for cooperation regarding the parties' ID-monitoring Offer.

Eyeonid Group AB has signed an agreement for its ID monitoring service with Willis Towers Watson. Eyeonid Group AB will provide its SAAS platform including its newly developed "360 modules", complemented with a tailor-made ID protection insurance that Willis Towers Watson will provide for a comprehensive offer to its existing and new customers.

Eyeonid Group AB and Willis Towers Watson signed a Letter of Intent on a long-term partnership on May 24, 2018. Now, the parties have also signed an agreement that implies that Eyeonid Group AB can offer a tailored ID protection insurance as part of its SAAS platform to the entire global marketplace, and Willis Towers Watson, with its global organization, will be able to offer a new and highly relevant ID protection product to its existing and new customers.

Now, joint planning and marketing activities continue, as well as completing a number of very interesting discussions with potential customers.

"Building partnerships that last over time is complex and takes a lot of time, so it's extraordinary that we have already reached a goal signing a partner agreement with one of the world's largest insurance brokers having a strong and competent sales force and solid experience of developing the best insurance for each country and customer. This does not mean that we will not be able to cooperate directly with insurance companies if they want to complete their own cyber insurance / ID protection insurance, but cooperation with Willis Towers Watson enables larger, global business agreements with, for example, global mobile operators, where we can offer a very attractive and unique overall concept ", says Daniel Söderberg, CEO Eyeonid Group AB.

"As cybercrime / ID theft increases worldwide, we are pleased to announce this collaboration that provides our customers with a unique product that offers protection both before, during and after an ID theft incident by preventing, identifying and limiting the consequences of an incident" says Johan Forsgård, CEO Willis Towers Watson Sweden.

Eyeonid was founded in 2014 and has since its inception developed a technically complex and advanced platform for proactive ID protection services. The company's service monitors and alerts customers when sensitive, private and corporate digital information, such as login credentials, credit card numbers and social security numbers, are found at unauthorized sites on the internet, whereupon the customer can act and protect himself.

This information is information that Eyeonid Group AB (publ) is obliged to disclose under the EU Market Abuse Regulation. The information was provided, through the contact of the above contact person, for publication on the 13th of August 2018.
