

BIOVICA PRESENTS AT THE ANNUAL BIOMARKERS CONGRESS IN MANCHESTER 2018

Uppsala, Sweden, November 8, 2017. Mattias Bergqvist, VP Clinical Development at Biovica is invited to talk at the 13th Annual Biomarkers Congress 15-16 February 2018, Manchester, UK. As part of the congress Mattias will present at a free webinar on November 28, 2017.

At the conference Mattias will address how novel ways to measure cell proliferation offers new solutions to old challenges in drug development. Enhanced evaluation of drug efficacy by new assays such as DiviTum® can save development time and cost and provide key information during preclinical and clinical trials, with the aim to bring new drugs to the market faster.

The Biomarker Congress includes presentations, case studies, novel technologies and panel discussions focused on the opportunities and challenges of biomarker development.

ABOUT BIOVICA

Biovica develops and commercializes blood-based biomarker assays that improve monitoring of modern cancer therapies and predict patient outcome. The company's DiviTum® assay, a test for accurately measuring cell proliferation, has successfully demonstrated its capabilities to early evaluate therapy effectiveness in several clinical trials. Biovica aims to make best-possible-treatment from day one a reality.

Biovica collaborates with world-leading cancer institutes as well as pharmaceutical companies launching next-generation therapies. The company is ISO 13485 certified for Quality Management Systems. DiviTum® is CE-labeled and MPA-registered.
