Encavis AG Selects Greenbyte Energy Cloud for Data Management

Greenbyte is very pleased to announce that the German Encavis AG has selected Greenbyte Energy Cloud for their renewable energy data management. Encavis is one of the leading independent power producers in Europe. As of now the company manages 236 wind and solar PV parks in nine European countries with a total generating capacity of over 1.5 Gigawatt (GW).

Greenbyte will install Encavis's wind assets in Energy Cloud, an innovative renewable energy portfolio management platform, that allows wind and solar energy assets' operators and owners to transform their energy data into actionable insights. Breeze the wind farm management component of Energy Cloud, will offer Encavis the ability to monitor, analyze, plan and control their wind portfolio in a highly efficient way and directly, via one single system.

"Greenbyte's overall approach regarding the product itself, customer service and fast technical development were key factors for choosing Energy Cloud as our wind asset data management platform", says Marian Raschke, Head of Operations Germany and United Kingdom at Encavis AG.

"We are delighted that Encavis AG has selected our system to support the important work in getting renewable energy assets to reach their full potential. Encavis vision to build an energy system of the

GREENBYTE

future aligns with that of Greenbyte. We look forward to a long term and successful relationship" says Jonas Corn , Greenbyte CEO

About Encavis AG

Encavis AG is one of the leading independent power producers in the field of renewable energy in Europe. The company obtains and runs solar power plants and wind farms in Germany and in eight other European countries. The total generation capacity of the Encavis Group is currently over 1.5 GW and their solar portfolio is the third largest in Europe. Encavis AG is listed on the regulated market (Prime Standard) of the Frankfurt Stock Exchange, on the regulated market of the Hamburg Stock Exchange (ISIN: DE0006095003/WKN: 609500) and on the SDAX of the German Stock Exchange.

About Greenbyte

Greenbyte makes the industry leading independent renewable energy management system Energy Cloud – used globally by wind and solar PV owners, operators and asset managers to capture the full potential of renewable energy projects. Power plants are remotely connected to Greenbyte's platform via on-site SCADA systems – resulting in a single powerful tool to monitor, analyze, plan and control diverse renewable energy portfolios of any size. Currently 14 GW of renewable energy across 5 continents and 30 countries are monitored in Greenbyte's software.
