

Assemblin

Assemblin awarded security contract by Öresundskraft

Assemblin has been awarded a contract to deliver and install a new access control system for Öresundskraft in Helsingborg (Sweden). The assignment is part of Öresundskraft's long-term ambition to strengthen security across its premises.

The delivery includes a modern and scalable access control system, as well as related services covering installation, commissioning, training and documentation. The solution is designed to be reliable, flexible and easy to manage and further develop over time.

“This assignment confirms our expertise in security solutions for operations with high demands on quality and reliability. Öresundskraft has placed great emphasis on delivery quality, clear documentation and well-functioning service and support. We are pleased to have been entrusted with this assignment and look forward to a close and long-term collaboration,” comments Jonas Klarén, CEO Assemblin Electrical, SVP.

For Öresundskraft, the overall solution was a decisive factor in the choice of supplier. The focus has been on creating a future-proof and sustainable solution that contributes to a secure operating environment while also providing strong conditions for efficient management.

In the procurement process, Öresundskraft also placed emphasis on flexibility and the ability to ensure service and continued development over time.

“For us, it is important to have a solution that is modern, reliable and flexible. We selected Assemblin based on their ability to deliver high-quality end-to-end solutions, with clear documentation and strong conditions for long-term management,” says Johan Klinga, Business Area Manager, Öresundskraft.

The assignment also includes service and support.
