

## CELLINK's commercialized technology featured on the cover of Science Magazine

**CELLINK has partnered with Volumetric to commercialize the Lumen X Bioprinting platform in March 2019. Research conducted with the Lumen X technology platform is featured on the front page of Science Magazine Vol. 364, Issue 6439 and scientific breakthroughs achieved with the technology is published in the journal.**

In the Science Magazine publication led by Dr. Bagrat Grigoryan, the Lumen X platform successfully created functional vascular networks and demonstrated significant potential to enhance the study of intervascular transport, nutrient delivery, host engraftment and more.

The circulatory and pulmonary systems in air-breathing vertebrates contain intertwining networks of vessels that do not intersect with each other, and reproducing these structures has been a major challenge for many bioprinters.

CELLINK partnered with Texas-based startup Volumetric earlier this year to commercialize the Lumen X, a bioprinter that leverages more than one million points of light to construct microscopic features with speed, fidelity and precision. CELLINK, the world's first bioink company and the global leader in bioprinters and bioinks, continually seeks new partnerships to provide researchers with emerging capabilities and innovations in the field.

**About CELLINK**

CELLINK is the leading 3D bioprinter provider and the first bioink company in the world. We focus on developing and commercializing bioprinting technologies to allow researchers to print human organs and tissues for pharmaceutical and cosmetic applications. Founded in 2016 and active in more than 50 countries, CELLINK is changing the future of medicine as we know it. Visit [www.cellink.com](http://www.cellink.com) to learn more. CELLINK is listed on Nasdaq First North under CLNK. Erik Penser Bank AB is the company's certified adviser, available by phone at +46 846 383 00 and by email at: [certifiedadviser@penser.se](mailto:certifiedadviser@penser.se).
