

Press release
Lund 14 AUG 2020

Scandinavian ChemoTech receives its first delivery of CE-marked treatment kits for IQwave™

As an important part of the large CE-marking project, the company will soon receive its first delivery of CE-marked treatment kits intended for IQwave™ and D-EECT treatment from its manufacturer.

Even though the company has not completed the certification of the entire IQwave™ system, it is very gratifying that we have reached this intermediate goal. The approval also facilitates sales to state hospitals in both India and the Philippines.

Scandinavian ChemoTech AB (publ)

ChemoTech is a Swedish medical technology company based in Lund that has developed a patented technology platform to offer cancer patients access to a new treatment alternative, tumour specific electroporation, available for treatment of both humans and animals. There are a large number of cancer patients whose tumours for various reasons cannot be treated by conventional methods but where tumour specific electroporation can be a solution. Therefore, the company continuously evaluates new opportunities and areas of application for the technology. ChemoTech's shares (CMOTEC B) are listed on Nasdaq First North Growth Market in Stockholm and Erik Penser Bank is the company's Certified Adviser. Read more at: www.chemotech.se.
