

# OX2 acquires a 170 MW wind power project in Sweden from Stora Enso

**OX2 and Stora Enso have agreed on the purchase of the Hälsingskogen wind power project in the municipality of Ovanåker, Gävleborg County, Sweden.**

According to the agreement OX2 acquires 100 percent of the project rights from Stora Enso, which remains the landowner. The wind farm will include 37 wind turbines with a total possible capacity of 170 MW. The estimated annual electricity production amounts to approximately 380 GWh, which corresponds to the average electricity consumption for 72,000 households per year.

“Wind power needs to be quadrupled if Sweden is to reach the national goal of 100 percent renewable electricity production by 2040, according to the Swedish Energy Agency's and the Swedish Environmental Protection Agency's wind strategy. The conditions for a wind farm in Ovanåker are good. When we establish wind parks, we always strive for a positive development of the nearby area. We also work with programs for increased biodiversity in areas where we construct wind turbines”, says Hillevi Priscar, Country Manager Sweden, OX2.

**About OX2**

OX2 develops, builds and manages renewable power generation. OX2 has taken a leading position in large-scale onshore wind power over the past 15 years, having developed and constructed more than 2.4 GW of wind power in Europe. OX2 has contracted asset management services for 44 wind farms (2.28 GW). OX2's mission is to lead the ongoing energy transition and promote a more sustainable future. OX2 has operations in Sweden, Norway, Finland, Poland, Lithuania and France. Its head office is in Stockholm, Sweden. Sales revenue in 2020 amounted to €510 million. [www.ox2.com](http://www.ox2.com)
