

Svenska Aerogel Holding AB (publ) receives Ramp-up order from Outlast® Technologies

Svenska Aerogel has received its first commercial order from Outlast® Technologies (Outlast®), a global leader in thermal management solutions for the textile industry. The order is valued at 924 000 SEK and represents the largest single material order to date for Svenska Aerogel.

The order pertains to Outlast® Technologies initial commercial production run of the Aersulate® product, in which Quartzene® is incorporated to create thermally insulating textile fibers. The customer is now preparing to deploy Aersulate® fabrics and waddings across several high-value product segments, including bedding, safety equipment, footwear and apparel, targeting global markets.

“Our goal is to establish Aersulate® as a scalable performance solution with broad market applicability across industries where thermal management, comfort, and lightweight insulation offer strong competitive differentiation,” says Volker Schuster, Head of Research & Development, Outlast® Technologies GmbH.

Aersulate® was launched at the beginning of 2025, in line with Svenska Aerogels previous communications, and has today been recognized as “Material Innovation of the Year” at the 2025 Innovate Textile Awards, organized by WTiN.
