

## Svenska Aerogel publishing exclusive interview with Outlast® Technologies

**In 2025, Outlast® Technologies launched the thermally insulating textile fiber Aersulate®, containing Svenska Aerogels (“the Company”) material Quartzene®. In an interview conducted by Dagens Börs, Martin Bentz, CEO of Outlast® Technologies (“Outlast”), discusses the development of Aersulate®, why Quartzene® was selected, and its future market potential.**

*Aersulate® wadding*

Aersulate® is designed for textile applications where lightweight insulation and high thermal performance are essential, including bedding, outdoor apparel and workwear.

“We currently have a strong focus on our aerogel-based insulation technology, which we are developing using raw materials from Svenska Aerogel, and the results so far are very encouraging”, says Martin Bentz, CEO of Outlast® Technologies. “By integrating Svenska Aerogel’s aerogel powder into our fibers and textile structures, it becomes possible to produce very lightweight and thin insulation materials while maintaining a high insulation performance.”

December 5, 2025, Svenska Aerogel received its first commercial order from Outlast. The order represented the largest single material order to date for the Company.

The full interview with Martin Bentz, conducted by Per Stolt, Dagens Börs, is available on Svenska Aerogels website: [aerogel.se/news/](https://aerogel.se/news/)
