ÅF wins major infrastructure assignment in Gothenburg

ÅF has, in conjunction with White Architects, won one of the main contracts for the Swedish Transport Administration's "West Link" (*Västlänken*) project.

The assignment "Korsvägen – Railway station" will run over a three-year period and we estimate the value of the project for ÅF to be approximately SEK 75 million.

ÅF will support the Swedish Transport Administration with competence in the technical fields of geotechnology, rock engineering, civil construction, hydrogeology, environmental impact assessments and structural engineering.

The West Link Project is a planned 8-kilometre long railway tunnel under central Gothenburg. In addition to a new Central Station, two new stations will also be built. The main purpose of the project is to facilitate travel in Gothenburg and West Sweden. When completed, the link will permit an increase in capacity for commuter rail traffic, improve accessibility to the city and reduce the vulnerability of the rail system as a whole.

ÅF AB
Corporate Information

The ÅF Group is a leader in technical consulting, with expertise founded on more than a century of experience. We offer highly qualified services and solutions for industrial processes, infrastructure projects and the development of products and IT systems. The ÅF Group currently has close to 5,000 employees. Our base is in Europe, but our business and our clients are found all over the world.
